Notification of Public Drainage System Maintenance on ACD #31

Dear Landowner,

The Rice Creek Watershed District (RCWD), as drainage authority, is responsible for maintaining Anoka County Ditch 31 (ACD 31). This Public Ditch is either on, or intersects, a portion of your property. The RCWD will be performing routine maintenance which will consist of selective tree removal and sediment (spoil) excavation. The project is anticipated to start in late January and take approximately two to three weeks (note that dates are subject to change due to weather conditions or other site-specific restrictions).

The attached map indicates the anticipated locations of the work areas. Please note that the map is approximate. The work extent is anticipated to be similar to the 2016-2017 repair. The drainage authority reserves the right to perform maintenance on either side of the ditch to the extent that is reasonable and necessary.

If there are any questions, please call or email Ashlee Ricci at 763-398-3082 or aricci@ricecreek.org or Tom Schmidt at 763-398-3076 or tschmidt@ricecreek.org.

Sincerely,

A handwritten signature in black ink that reads "Tom Schmidt".

Tom Schmidt
RCWD Public Drainage Inspector
