

Petition

To

Require an Environmental Study Prior to City of Columbus Council Approval
For An Asphalt Plant on West Freeway Drive

As a concerned citizen of the City of Columbus, Minnesota, we respectfully request that the City Council of Columbus defer any decision regarding the change in zoning at the location of 13345 and 13363 West Freeway Drive to Commercial Industrial. In addition, the granting of a Conditional Use Permit, (CUP) that will allow Bituminous Roadways to construct and operate a permanent facility for the production of asphalt and handling of various construction materials. The site will also be used for a concrete batch plant and a construction material storage/handling facility.

Prior to taking any action, we feel it imperative that the City of Columbus require Bituminous Roadways to perform all necessary environmental studies in order to ensure the health and safety of its residence and livestock. Based on the documented impacts of an asphalt and material storage operation such as air emission, odors, noise, fugitive dust, petroleum storage and traffic we feel it is critical that these studies be completed.

We feel that such a delay is essential to ensure all procedural and notice requirements have been met as well as all health and safety measure instituted. This request is consistent with virtually every other City, in the nation, considering an asphalt plant within their boundaries.

Please, we implore you that the only thing to lose is a little time, which is a small price to pay compared to our health. As the saying goes, "it's better to be safe than sorry".

Prior to taking any action, we feel it imperative that the City of Columbus require Bituminous Roadways to perform all necessary environmental studies in order to ensure the health and safety of its residence and livestock. Based on the documented impacts of an asphalt and material storage operation such as air emission, odors, noise, fugitive dust, petroleum storage and traffic we feel it is critical that these studies be completed.

We feel that such a delay is essential to ensure all procedural and notice requirements have been met as well as all health and safety measure instituted. This request is consistent with virtually every other City, in the nation, considering an asphalt plant with their boundaries.

Please, we implore you that the only thing to lose is a little time, which is a small price to pay compared to our health. As the saying goes, "it's better to be safe than sorry".

Petition

To

**Require an Environmental Study Prior to City of Columbus Council Approval
For An Asphalt Plant on West Freeway Drive**

As a concerned citizen of the City of Columbus, Minnesota, we respectfully request that the City Council of Columbus defer any decision regarding the change in zoning at the location of 13345 and 13363 West Freeway Drive to Commercial Industrial. In addition, the granting of a Conditional Use Permit, (CUP) that will allow Bituminous Roadways to construct and operate a permanent facility for the production of asphalt and handling of various construction materials. The site will also be used for a concrete batch plant and a construction material storage/handling facility.

Prior to taking any action, we feel it imperative that the City of Columbus require Bituminous Roadways to perform all necessary environmental studies in order to ensure the health and safety of its residence and livestock. Based on the documented impacts of an asphalt and material storage operation such as air emission, odors, noise, fugitive dust, petroleum storage and traffic we feel it is critical that these studies be completed.

We feel that such a delay is essential to ensure all procedural and notice requirements have been met as well as all health and safety measure instituted. This request is consistent with virtually every other City, in the nation, considering an asphalt plant with their boundaries.

Please, we implore you that the only thing to lose is a little time, which is a small price to pay compared to our health. As the saying goes, "it's better to be safe than sorry".

Based on the documented impacts of an asphalt and material storage operation such as air emission, odors, noise, fugitive dust, petroleum storage and traffic we feel it is critical that these studies be completed.

We feel that such a delay is essential to ensure all procedural and notice requirements have been met as well as all health and safety measure instituted. This request is consistent with virtually every other City, in the nation, considering an asphalt plant within their boundaries.

Please, we implore you that the only thing to lose is a little time, which is a small price to pay compared to our health. As the saying goes, "it's better to be safe than sorry".

Petition

To

Require an Environmental Study Prior to City of Columbus Council Approval

For An Asphalt Plant on West Freeway Drive

As a concerned citizen of the City of Columbus, Minnesota, we respectfully request that the City Council of Columbus defer any decision regarding the change in zoning at the location of 13345 and 13363 West Freeway Drive to Commercial Industrial. In addition, the granting of a Conditional Use Permit, (CUP) that will allow Bituminous Roadways to construct and operate a permanent facility for the production of asphalt and handling of various construction materials. The site will also be used for a concrete batch plant and a construction material storage/handling facility.

Prior to taking any action, we feel it imperative that the City of Columbus require Bituminous Roadways to perform all necessary environmental studies in order to ensure the health and safety of its residence and livestock. Based on the documented impacts of an asphalt and material storage operation such as air emission, odors, noise, fugitive dust, petroleum storage and traffic we feel it is critical that these studies be completed.

We feel that such a delay is essential to ensure all procedural and notice requirements have been met as well as all health and safety measure instituted. This request is consistent with virtually every other City, in the nation, considering an asphalt plant within their boundaries.

Please, we implore you that the only thing to lose is a little time, which is a small price to pay compared to our health. As the saying goes, "it's better to be safe than sorry".

Petition

To

**Require an Environmental Study Prior to City of Columbus Council Approval
For An Asphalt Plant on West Freeway Drive**

As a concerned citizen of the City of Columbus, Minnesota, we respectfully request that the City Council of Columbus defer any decision regarding the change in zoning at the location of 13345 and 13363 West Freeway Drive to Commercial Industrial. In addition, the granting of a Conditional Use Permit, (CUP) that will allow Bituminous Roadways to construct and operate a permanent facility for the production of asphalt and handling of various construction materials. The site will also be used for a concrete batch plant and a construction material storage/handling facility.

Prior to taking any action, we feel it imperative that the City of Columbus require Bituminous Roadways to perform all necessary environmental studies in order to ensure the health and safety of its residence and livestock. Based on the documented impacts of an asphalt and material storage operation such as air emission, odors, noise, fugitive dust, petroleum storage and traffic we feel it is critical that these studies be completed.

We feel that such a delay is essential to ensure all procedural and notice requirements have been met as well as all health and safety measure instituted. This request is consistent with virtually every other City, in the nation, considering an asphalt plant with their boundaries.

Please, we implore you that the only thing to lose is a little time, which is a small price to pay compared to our health. As the saying goes, "it's better to be safe than sorry".

For An Asphalt Plant on West Freeway Drive**

As a concerned citizen of the City of Columbus, Minnesota, we respectfully request that the City Council of Columbus defer any decision regarding the change in zoning at the location of 13345 and 13363 West Freeway Drive to Commercial Industrial. In addition, the granting of a Conditional Use Permit, (CUP) that will allow Bituminous Roadways to construct and operate a permanent facility for the production of asphalt and handling of various construction materials. The site will also be used for a concrete batch plant and a construction material storage/handling facility.

Prior to taking any action, we feel it imperative that the City of Columbus require Bituminous Roadways to perform all necessary environmental studies in order to ensure the health and safety of its residence and livestock. Based on the documented impacts of an asphalt and material storage operation such as air emission, odors, noise, fugitive dust, petroleum storage and traffic we feel it is critical that these studies be completed.

We feel that such a delay is essential to ensure all procedural and notice requirements have been met as well as all health and safety measure instituted. This request is consistent with virtually every other City, in the nation, considering an asphalt plant with their boundaries.

Please, we implore you that the only thing to lose is a little time, which is a small price to pay compared to our health. As the saying goes, "it's better to be safe than sorry".

The site will also be used for concrete batch plant and a construction material storage/handling facility.

Prior to taking any action, we feel it imperative that the City of Columbus require Bituminous Roadways to perform all necessary environmental studies in order ensure the health and safety of its residence and livestock. Based on the documented impacts of an asphalt and material storage operation such as air emission, odors, noise, fugitive dust, petroleum storage and traffic we feel it is critical that these studies be completed.

We feel that such a delay is essential to ensure all procedural and notice requirements have been met as well as all health and safety measure instituted. This request is consistent with virtually every other City, in the nation, considering an asphalt plant with their boundaries.

Please, we implore you that the only thing to lose is a little time, which is a small price to pay compared to or health. As the saying goes, "it's better to be safe than sorry".

Petition

To

Require an Environmental Study Prior to City of Columbus Council Approval
For An Asphalt Plant on West Freeway Drive

As a concerned citizen of the City of Columbus, Minnesota, we respectfully request that the City Council of Columbus defer any decision regarding the change in zoning at the location of 13345 and 13363 West Freeway Drive to Commercial Industrial. In addition, the granting of a Conditional Use Permit, (CUP) that will allow Bituminous Roadways to construct and operate a permanent facility for the production of asphalt and handling of various construction materials. The site will also be used for concrete batch plant and a construction material storage/handling facility.

Prior to taking any action, we feel it imperative that the City of Columbus require Bituminous Roadways to perform all necessary environmental studies in order ensure the health and safety of its residence and livestock. Based on the documented impacts of an asphalt and material storage operation such as air emission, odors, noise, fugitive dust, petroleum storage and traffic we feel it is critical that these studies be completed.

We feel that such a delay is essential to ensure all procedural and notice requirements have been met as well as all health and safety measure instituted. This request is consistent with virtually every other City, in the nation, considering an asphalt plant with their boundaries.

Please, we implore you that the only thing to lose is a little time, which is a small price to pay compared to or health. As the saying goes, "it's better to be safe than sorry".
